

Lab Information

Your doctor has ordered lab tests for your child. Many of the lab tests that are ordered are from specialty labs, which will be sent to your home. It is our experience that these tests be paid up front rather than filed with your insurance. The lab will send you a receipt that you can use to file with your insurance for possible reimbursement. Please note that if the lab files your insurance for you, the price of the test increases significantly in most cases. If your insurance does not pay, you will have to pay the higher price.

The requisition form asks for a doctor's signature and diagnosis codes. These have already been faxed to the lab at the time we requested your kit. You DO NOT need a signature or codes.

Listed below are commonly ordered labs with the prepaid price and the list price. Prices are subject to change at any time. If you have questions regarding your specimen collection, please call the lab directly. Phone numbers are listed below.

Genova Diagnostics (formerly Great Smokies) Price

- IgG Food Antibodies \$151
